

Ministerie van Defensie

Past, Present, and Future of E&T Within the Dutch MoD

Release Date: Wednesday, 06 November 2019

Premiere Time: 1000-1100 (EST)

(Webcast will remain open online for one week following the premiere time)

Speakers: Frank Gaiser and Armand Vincentie of the Netherlands Defense Force ADL Partnership Center

How did the Dutch Ministry of Defence go from having a fragmented past to an aligned present, and how are they planning on improving their processes further in the future? If you've always wanted to know the "Dutch way" in terms of the Education and Training (Software) (E&T (&S)) field, this webinar is for you! In just 20 minutes you'll learn about the past, present and future of Education & Training in the Dutch MoD.

Subject: Our speakers will give you an overview of the fragmented past, aligned present, and challenging future of Education and Training within the Dutch MoD. They will share how they aligned supply and demand, implemented their chain of E&T Software, and showcase a short demo of the working environment. Building on the concept of centralized and aligned data, the speakers will share with you several plans for the future and how it incorporates the Total Learning Architecture (TLA).

Audience:

- Anyone in the E&T Software field concerned with making applications work today and tomorrow: Information Managers, Information Architects, System Engineers, and Software Developers.
- Any management, staff, and personnel in the E&T business who work with modern software and centralized data but lack the hassle of double administrations.
- Anyone in the E&T field who wants an inside look at today's software and future functions.

How: Virtual and On-Demand. Stay tuned for a registration link via email. Those who have registered will receive an email including an access link. Once the webinar is concluded, a recording will also be sent out. This webinar at your convenience and you will also receive a recording of the webinar. Please note that the webinar and link will remain live for 1 week. After

that time, you can access the webinar through the ADL Initiative's YouTube page and adlnet.gov.

Speaker Biography: Frank Gaiser and Armand Vincentie have been with the Dutch MoD for more than 30 years. They evolved from a planner (Gaiser) and developer (Vincentie) to Senior Information Manager and Senior Consultant, respectively, within the field of E&T, Simulation, and Operational Readiness. Their daily business concerns align the operational side of the business to the landscape of information, such as management, architecture, and security. They leverage interesting topics in analytics, integration, and efficiency to increase value for the business.
